

Better breathing can start with a conversation

How well do you really know your asthma? Answer the questions below and see the next page, then bring this to your next doctor's visit. This information can help your doctor determine what type of asthma you may be experiencing.

Take a closer look at your asthma. Are you:

Using a rescue inhaler more than 2 times a week?

☐
YES☐
NO

Seeking emergency care at least 1 time a year because of your asthma?

☐
YES☐
NO

Using oral steroids for your asthma?

☐
YES☐
NO

Waking up at least twice a month because of your asthma?

☐
YES☐
NO

If you answered yes to any of these questions, you could have eosinophilic asthma, a type of asthma FASENRA is specifically approved to treat.

Go to the next page for helpful questions you can **ask your doctor about FASENRA.**

 Please describe any asthma symptoms you've been experiencing and how asthma has been impacting your life:

IMPORTANT SAFETY INFORMATION

Do not use FASENRA if you are allergic to benralizumab or any of the ingredients in FASENRA.

Do not use to treat sudden breathing problems.

FASENRA may cause serious side effects, including:

- **allergic (hypersensitivity) reactions, including anaphylaxis.** Serious allergic reactions can happen after you get your FASENRA injection. Allergic reactions can sometimes happen hours or days after you get your injection. Tell your healthcare provider or get emergency help right away if you have any of the following symptoms of an allergic reaction:
 - swelling of your face, mouth and tongue
 - breathing problems
 - fainting, dizziness, feeling lightheaded (low blood pressure)
 - rash
 - hives

Please see additional Important Safety Information throughout and full Prescribing Information, including Patient Information and Instructions for Use, available at [FASENRA.com](https://fasenra.com).

 **Fasenra**[®]
(benralizumab) Subcutaneous
Injection 30 mg

QUESTIONS TO ASK YOUR DOCTOR ABOUT YOUR ASTHMA:

Below are some questions to help start the conversation with your doctor and determine if FASENRA can help. Take them with you to your next appointment.

- Could eosinophils be a cause of my asthma?
- Can I get a blood test to measure my eosinophil count?
- What does FASENRA do to eosinophils?
- Is FASENRA right for my type of asthma?
- How often will I need to take FASENRA?

Additional questions or thoughts for your doctor:

ASK YOUR DOCTOR HOW TO MOVE FORWARD WITH FASENRA

IMPORTANT SAFETY INFORMATION (cont'd)

Before using FASENRA, tell your healthcare provider about all of your medical conditions, including if you:

- are taking oral or inhaled corticosteroid medicines. **Do not** stop taking your corticosteroid medicines unless instructed by your healthcare provider. This may cause other symptoms that were controlled by the corticosteroid medicine to come back.
- have a parasitic (helminth) infection.
- are pregnant or plan to become pregnant. It is not known if FASENRA will harm your unborn baby. Tell your healthcare provider if you become pregnant during your treatment with FASENRA.
 - o There is a pregnancy exposure registry that monitors pregnancy outcomes in women exposed to FASENRA during pregnancy. Healthcare providers can enroll patients or encourage patients to enroll themselves by calling **1-877-311-8972** or visiting www.mothersbaby.org/fasenra.
- are breastfeeding or plan to breastfeed. It is not known if FASENRA passes into your breast milk. Talk to your healthcare provider about the best way to feed your baby if you use FASENRA.
- are taking prescription and over-the-counter medicines, vitamins, or herbal supplements.

Do not stop taking your other asthma medicines unless instructed to do so by your healthcare provider. Tell your healthcare provider if your asthma does not get better or if it gets worse after you start treatment with FASENRA.

The most common side effects of FASENRA include: headache and sore throat. These are not all the possible side effects of FASENRA.

APPROVED USE

FASENRA is a prescription medicine used with other asthma medicines for the maintenance treatment of asthma in people 12 years and older whose asthma is not controlled with their current asthma medicines. FASENRA is not used to treat other problems caused by eosinophils and is not used to treat sudden breathing problems. It is not known if FASENRA is safe and effective in children under 12 years of age.
